BANKRUPTCY PREDICTOR

Know what to expect from your Applicants

What it is:

Bankruptcy Predictor uses powerful data sampling and analysis to assess the likelihood of near-future consumer bankruptcies.

What it does:

Bankruptcy Predictor generates scores from 100 to 950. The higher an individual's score, the less likely they are to file for bankruptcy within the next 12 to 24 months.

Bankruptcy Predictor captures more potential bankruptcies in the high risk scoring group and can stand alone or interface with other applicant screening tools.

How you benefit:

Applicant knowledge can be your greatest business asset—join the Rentcheck network today!
